

Alice Amsden: Development economist (1944-2012)

Alice Amsden, renowned development economist who challenged the mainstream approach and pioneered a new interpretation of development especially in Asian countries, passed away in early March 2012. She was a committed and intrepid scholar, whose lively and irrepressible personality and impressive research lit up the field and inspired many others. She will be sorely missed. Some tributes to Alice Amsden can be found on <http://www.triplecrisis.com>.
